Dear Mr. Poole

I would like to follow up with you regarding the rehab work on Highway 17 and the two intersections on Duke Street.

As you are aware, these work areas contain high traffic volumes and many businesses operate daily within these areas. As such, Miller Northwest believes that the best course of action for all parties concerned, is to complete this paving and milling work during night hours instead of our usual work schedule.

The benefits are:

- Lower disruption to traffic flows
- Little to no impact to business in these corridors
- Increase safety to our workers as traffic volumes are reduced

Our proposed work schedule would be from 6:30 pm to 7:00 am, starting on June 5th to on or about June 15th; Weather pending.

To complete this type of work, Miller Northwest needs to operate their stationary asphalt plant located at our Sandy Beach Pit location: 437 Sandy Beach rd.

It should be noted that an increase noise level would be emitted at the work site and at the plant site however residential housing is minimal.

As such we request that the city grant us permission to undertake this work and furthermore operate the sandy beach pit for this work during the hours noted above.

Should you have any questions or concerns please don't hesitate to contact me.

Sincerely

Eric Piovesan P. Eng.
Construction Manager
